

FOR IMMEDIATE RELEASE:

Comprehensive Electric Vehicle Charging and Telematics Solution

San Antonio, TX, March, 2019 – E.J. Ward, Inc., announces the integration of electric vehicle charging stations with our automated fueling solutions. Users can gain on-site access to any EV charger through Ward Fuel Control Terminals. Administrators program accessibility rules and limitations through Ward Fuel View software, which also tracks usage and virtually eliminates costly access fees.

The PowerCharge Pro EV charger offered by Ward is available in multiple configurations such as wall mount or pedestal, and single or dual ports. Able to discharge up to 40 amps, the PowerCharge Pro will meet the most demanding fleet's EV charging requirements.

As an authorized Geotab reseller, Ward can also track any EV's telematics and GPS with a Geotab GO8 or GO9 device, and Fleet View powered by MyGeotab, providing in-depth details and trends for the most efficient EV fleet possible.

"We are the industry's only sole source provider for EV charging *and* vehicle telematics and GPS," said Markay Ward, President, and CEO. "We feel this offers strong value to fleet managers, helping them to meet current and future green fleet compliance requirements."

Since 1974, E.J. Ward, Inc. as an industry leader, has been at the forefront of fuel management technology development for fleets. Ensuring accountability and security of fuel usage by public and private fleets, Ward's Suite of Solutions provide significant savings for its customers through Automated Fuel Management, GPS based Asset Tracking and Enterprise Application Integration.
