

## FOR IMMEDIATE RELEASE:

E.J. Ward is a Geotab Reseller

### **One-stop shopping for real-time, automated fueling, telematics and GPS solutions packages for fleet management and optimization**

San Antonio, TX, March 18, 2019 – E.J. Ward, Inc., is proud to announce that we have recently become a Geotab reseller. As a global leader in the telematics industry, Geotab provides real-time telematics with GPS vehicle tracking devices and customizable software.

Geotab's GO8 and GO9 devices deliver complete telematics and GPS for any vehicle such as waste idle time, harsh braking, accelerating, speeding, and mpg usage. Fleet View software, powered by MyGeotab, provides a data-rich viewing and reporting platform through customizable dashboards and reports. Revealing trends and patterns provides opportunities to make informed, cost-saving and safety-enhancing decisions.

"Geotab is the perfect choice to include with our Fleet Management solutions," said Markay Ward, President and CEO. "As a Geotab reseller, we can offer our customers the industry's only true end-to-end value solution. With Ward's automated fueling system and Fleet View software powered by MyGeotab, complete, automated fueling and real-time vehicle tracking and telematics from once source is now possible."

*Since 1974, E.J. Ward, Inc. has been the industry leader, and at the forefront of fleet fuel management technology development. Ensuring accountability and security of fuel usage by public and private fleets globally, Ward's Solution Suite provides significant savings for its customers through organization-wide Automated Fuel Management, GPS based Asset Tracking and Enterprise Application Integration.*
